Expand the reach of your property room with
# Officer Drop

## Officer Drop Module

With Officer Drop, police officers and detectives can now begin the chain of custody by entering information when depositing evidence in a designated evidence collection location. Recording item-type and other pertinent information, Officer Drop allows the property officer to pick up evidence and review the corresponding data, saving the time of entering the information twice!

**Reduce paperwork and improve accuracy of data collection with Officer Drop**

- Perfect component for evidence drop stations outside of the property room

- Police officers and detectives can easily label and submit evidence to an unmanned secure area

- Can take up to a third less time to enter evidence data with the simple touch screen user interface

- Remote officers print labels, package evidence, and print receipts before securing evidence in a locked location or locker

- Eliminate paper vouchers and the uncertainty of bad handwriting

- Overnight drop off capability
